

SMISOL® Clim Platinum becomes SMISOL® Clim Aeterna™

Same reliability, new performance and opportunities.

Dear Partner,

together with you we have traveled a long way with **SMISOL® Clim Platinum**, a product that has placed itself among the best ones on the market thanks to its well-known technical characteristics and ease of installation.

Today we take a step forward together:

SMISOL® Clim Aeterna™ is now with us, the natural evolution of **SMISOL® Clim Platinum**. A qualitative leap that allows us to respond to new market needs, with superior performance and requirements that pave the way for new exclusive opportunities.

With **SMISOL® Clim Aeterna™** we maintain all the quality characteristics for which **SMISOL® Clim Platinum** has established itself as a flagship product: durability (proven by aging tests) and ease of installation offer installers a reliable and simple tube to work with. Quality and market appreciation that have produced numerous imitation attempts.

With Smisol® Clim Aeterna™ we open up new possibilities together:

- **EPD certification**, to jointly address an increasingly selective market, with more restrictive specifications, tenders that include minimum environmental criteria (CAM) and projects that provide access to tax advantages (EPD International www.environdedec.com);
- **suited for the transport of R290 gases**, now a new market standard due to its high performance and compliance with European HFC regulations;
- **vapor diffusion resistance factor (μ) more than doubled**, for superior insulation performance;
- **new name and color**, that give the product a unique and immediately recognizable identity;
- **brand and color are being registered**, and any imitation attempts will be pursued in the appropriate forums to protect our innovation and our customers.

With this new stage, we continue a shared journey that combines experience and innovation and, now more than ever, we stand by your side to offer you all the support you need.

Thank you for the trust that accompanies us on this journey together.
